Taekwondo Shin Guards

PVA Dipped High Impact Foam Shin Guards protect both exponents. For the kicker, the shin and front of the lower leg are protected. For the person being struck, it protects them from being struck by the blade of the shin. Guards have Velcro straps to secure them around the legs. Our club logo sits on the front. These guards are from the manufacturers of a major Korean Taekwondo brand name, that allowed us to rebrand as our own. They're the highest of quality for the highest safety.
